
Open Transport Standards Amendment Process

Feb 2020

Introduction

- An Open Standard must have a transparent and published feedback & amendment /modification process
- This needs to be clear and communicated as widely as possible (e.g. on our website)

Open Transport Provides 2 x APIs

1. An API specification for federated transport customer account interoperability
2. An API specification for a centralized operator information look-up service
 - A directory of transport endpoints
 - An “API of APIs”

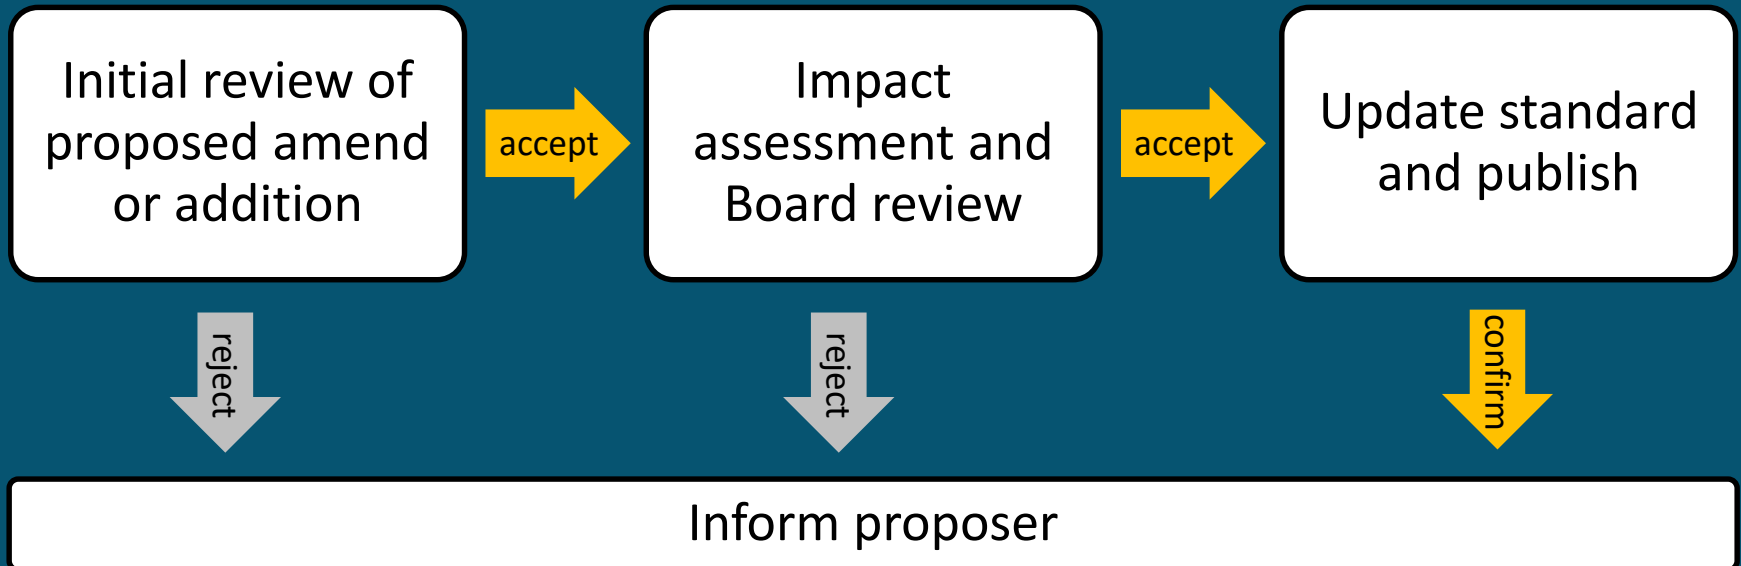

The Amendment Process

Proposed change emailed to:
contact@opentransport.co.uk

Impact assessment:
Gap analysis
Backwards compatible?
Major/Minor version?
Wider peer review required?

Public access:
SwaggerHub
ProgrammableWeb
Communication?
